EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Grant T. Langton on 6/22/06.

The application has been amended as follows:

In claim 1, at line 5, after "from an end of the shell", 'the recessed section having a ridge extending radially outwardly from the inside wall surface to the recessed section' has been deleted and --the recessed section comprises a ridge that extends radially inwardly therefrom, and that defines a transition between the recessed section and the remaining portion of the shell inner wall surface--has been inserted.

In claim 7, at line 7 of the claim, after "extending axially a distance from the end", 'and further having a ridge that extends radially outwardly from the inside wall surface to the recessed section' has been deleted and -- the recessed section comprises a ridge that extends radially inwardly therefrom, and that defines a transition between the recessed section and the remaining portion of the shell inner wall surface--has been inserted.

In claim 11, at line 11 of the claim, after "adjacent to the shell open end", 'the recessed section including a ridge that extends radially outwardly from the shell inside wall surface to the recessed section' has been deleted and --the recessed section comprises a ridge that extends

radially inwardly therefrom, and that defines a transition between the recessed section and the remaining portion of the shell inner wall surface--has been inserted.

In claim 14, at line 1, 'claim 13' has been deleted and --claim 11-- has been inserted.

Allowable Subject Matter

Claims 1,4-11 and 14-19 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art either taken singularly or in combination fails to disclose the recessed section comprises of a ridge extends and defines a transition between the recessed section and the remaining portion of the shell inner wall surface, a header plate including an outside diameter having an axially projecting section that extends therefrom, and a radially projecting lip that extends from an end of the axially projecting section, wherein the axially projecting shell section and the lip are both integral with the header plate and the header plate is positioned against the shell ridge to provide a nested attachment junction there between.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
